VISUAL ANALYSIS

Logo — navy wordmark; the "A" is built from a green→blue gradient with a motion slash cutting through it. Confident, athletic, geometric.

Aura (orb) — glassy green→blue sphere, white gloss top-right, soft colored glow/shadow. Alive, friendly, premium.

Website — dark-first, high contrast. Big ALL-CAPS headlines, full-bleed coral, purple and amber gradient blocks, white pill CTAs. Bold, motion-forward, builder energy.

Type — AKbalthom SuperheroKH: wide, geometric, monoline, all-caps. Needs a lowercase companion (Section 04).

THE ONE LINE

BUILD FASTER. THINK SHARPER. SCALE STRONGER.

WHO WE ARE

BRAND FOUNDATION

STORY & POSITIONING

AIM is an AI-powered platform for early-stage founders in Cambodia and Southeast Asia. It puts AI in the hands of the people closest to a problem and turns their insight into real products — fast. AIM is not a course or a seminar; it is a build-first platform where founders ship, test and scale with AI and a companion that moves with them: Aura.

TARGET AUDIENCE

Early-stage and aspiring founders, student builders, and professionals close to a real problem — technical or not. Backed by the ecosystem that supports them: investors, government, partners and media.

PERSONALITY

Bold

Big type, strong colour, clear stance. We take up space.

Energetic

Always in motion — fast, vibrant, forward.

Action-oriented

Build over talk. Verbs, outcomes, shipped work.

Human

Warm and real. Aura gives the AI a friendly face.

Optimistic

AI is opportunity, open to anyone, right now.

VOICE & TONE

Direct, confident, human. Short sentences. Verbs first. We sound like a builder who's been there — encouraging, never corporate, never hype-for-hype's-sake.

DO

"Build faster. Think sharper. Scale stronger."

"You don't need to be a coder. You need a real problem."

"Ship your first build in weeks."

DON'T

"Leverage our synergistic AI ecosystem to unlock value." (jargon)

"Earn a certificate of completion." (AIM is build-first)

"The world's #1 revolutionary platform." (empty hype)

TAGLINE USAGE

Primary: **Build faster. Think sharper. Scale stronger.** Set in display caps or Space Grotesk, three beats, always together. Short form: "AI in Motion." Don't translate the rhythm loosely or break the three-part structure.

THE MARK

LOGO SYSTEM

The AIM wordmark is built from three parts: the **gradient "A"** (green→blue, the brand's energy), the **motion slash** cutting through it (AI in motion), and the navy **"IM" + "AI in Motion"** wordmark (the grounded, credible base).

FULL COLOUR · ON LIGHT

REVERSED · ON DARK

MONO · NAVY

MONO · WHITE

ON BRAND GRADIENT

CLEAR SPACE & MINIMUM SIZE

Clear space = the height of the "A" on all sides. Minimum width: 22 mm print / 120 px screen for the full lockup; below that, use the "A" icon alone. Variations: primary horizontal, monogram (AIM), and the gradient "A" icon for avatars and favicons.

PROTECT THE MARK

NEVER DO THIS

- **Don't stretch**
Scale proportionally.

- **Don't recolour**
Use approved versions.

- **Don't rotate**
The slash stays level.

- **Don't put colour on gradient**
Use the white version.

- **Don't lower opacity**
Always solid.

- **Don't use busy fields**
Clean backdrop only.

LOGO + ORB LOCKUP

The logo and Aura appear together only in **brand moments** — covers, intros, profiles, hero sections. Aura sits to the right of the wordmark at roughly the cap-height-to-1.4× of the "A", never overlapping the letters, with its glow clear of the type. In running UI and documents, use the logo OR Aura, not both.

BRAND LOCKUP · LOGO + AURA ON DARK

PALETTE

COLOR SYSTEM

Navy and Carbon ground the brand. The green→blue **Motion Gradient** is the signature — it lives in the logo and in Aura. Coral, Purple and Amber are high-energy accents for full-bleed section blocks.

PRIMARY & SIGNATURE

ACCENT GRADIENTS (from the marketing site)

USAGE RATIO

60 Carbon / Navy & neutrals · 30 Motion Gradient & greens/blues · 10 one accent gradient per view.

RULES

One accent gradient per layout — never coral and purple in the same block. The Motion Gradient is reserved for brand/Aura, not body text. Never place vibrant text on a vibrant block; keep type white or navy.

MODES

DARK & LIGHT

AIM is **dark-first** — Carbon is home. Light mode is the warm, calm counterpart for documents and reading.

DARK (DEFAULT)

Bg Carbon #0E0E12 · surfaces #16171D / #1F2028 · text white / #D7DCE4 · accents at full saturation · Aura with glow.

LIGHT

Bg warm paper #F2F0EA · cards white · text Navy #1E2D4E / Slate · accents as blocks · Aura with wave shadow.

NEUTRALS

Maintain WCAG AA contrast in both modes. White on Carbon and Navy on Paper both pass comfortably; never set Green or Amber as body text on light.

TYPE

TYPOGRAPHY

SuperheroKH owns the loud, all-caps moments. It can't carry lowercase or body, so it needs a geometric companion that holds the same energy at small sizes.

AA

AKbalthom SuperheroKH

Display only • ALL CAPS. Hero headlines and section titles.
Wide, geometric, monoline; Khmer-Latin hybrid. Never lowercase, never body. **specimen shown in stand-in**

AA

Space Grotesk — recommended companion

Subheads, UI, buttons, sentence-case headlines. Geometric with a techy edge that echoes SuperheroKH without copying it. Weights 500 / 700.

WHY THESE COMPANIONS

Space Grotesk (primary) — geometric construction and slightly idiosyncratic details mirror SuperheroKH's athletic, tech-forward feel; holds up bold and works in sentence case. **Plus Jakarta Sans** (body) — geometric-humanist, highly legible at 14–17px, friendly and modern, strong multilingual support for a Cambodia/SEA audience. **Outfit** (alternate) — very wide and geometric; closest match to SuperheroKH's proportions when you need a big lowercase headline the display face can't do. All three are free Google Fonts.

TYPE HIERARCHY & SCALE (desktop / mobile)

DISPLAY	SuperheroKH • 72/40 px • LH 1.0 • +1%	BUILD FASTER
H1	SuperheroKH • 48/32 • LH 1.05	SECTION TITLE
H2	Space Grotesk 700 • 32/24 • LH 1.1	Subsection heading
H3	Space Grotesk 600 • 24/20 • LH 1.2	Block title
BODY	Plus Jakarta 400 • 17/16 • LH 1.6	Default running text for UI and docs.
CAPTION	Plus Jakarta 400 • 14 • LH 1.5	Helper text and captions.
LABEL	Space Grotesk 600 • 12 • CAPS • +8%	EYEBROW / LABEL

Pairing rules: one display + one companion per layout. **Anti-patterns:** SuperheroKH in lowercase or long paragraphs; two display faces together; Space Grotesk and Outfit both as display in one layout.

OUR AI COMPANION

MEET AURA

Aura is not decoration — it is AIM's AI companion, the face of "AI in motion." Aura represents the intelligence and momentum that builds *with* the founder: present, alive, always moving.

ANATOMY

Gradient core — green (top-right) to blue (bottom-left). **Gloss highlight** — a single white specular near the top-right; the light source never moves. **Glow / shadow halo** — the signature coloured aura: a soft green-blue glow on dark, a wave shadow on light.

EXPRESSION STATES

NEUTRAL

Smooth, even, slow float.
Resting.

THINKING

Internal shimmer, gloss drifts,
soft pulse.

ACTIVE

Brighter, tighter highlight,
stronger glow, slight scale-up.

CELEBRATING

Burst + sparkles, a quick
bounce.

USING AURA

PLACEMENT & RULES

SIZE SCALE

HERO ≥320PX

MEDIUM 160

SMALL 64

ICON 32

PLACEMENT

Hero focal point in marketing; bottom-right companion in UI. Clear space $\geq 0.5 \times$ diameter; never let type or edges touch the glow. One Aura per view.

DARK VS LIGHT

On dark, use the glow halo. On light, use the wave shadow. Never place Aura on a busy photo or on the brand gradient — it needs a calm field to read as glass.

ANIMATION

Gentle float (3–4s ease-in-out), idle glow pulse, spring bounce on appear, sparkle on success. Aura is always subtly alive, never static in product — but honour reduced-motion (hold still, keep the glow).

AVATAR VERSION

Centered sphere, minimal shadow, safe padding; simplify gloss below 48px. Works as the profile picture across all channels at 400×400.

DO

Keep the gloss top-right, the green-blue gradient, and the float. Let it breathe.

DON'T

Recolour, flatten, add a face, stretch, duplicate, or place on the gradient.

HOW IT LOOKS

VISUAL LANGUAGE

LAYOUT

Dark-first, 12-column grid, big type, high contrast. Stack full-bleed colour blocks (coral, purple, amber) between Carbon sections for rhythm — structured grid, energetic content. One idea per block.

CARDS & CONTAINERS

Radius 20–24px. Dark surface cards (#16171D) for content; vibrant gradient blocks for statements. Generous padding; never two vibrant blocks adjacent without a Carbon break.

THE MOTION SLASH

The slash from the "A" is the brand's repeating accent — a rising diagonal divider or underline. Always up-and-right.

PHOTOGRAPHY

Real founders building — screens, hackathon rooms, demo moments, Cambodian context. Candid, high-contrast; duotone in navy/green is on-brand. Avoid staged stock handshakes.

ICONS & ILLUSTRATION

Icons: 2px stroke, lightly rounded joins, geometric, one family. Illustration: gradient shapes, the slash, and Aura — never cartoon mascots or clip-art.

GRADIENT RULES

Motion Gradient = brand and Aura only. Accent gradients = energy blocks, one at a time. Never rainbow; never gradient on body text.

BOLD IDEA

Coral statement block

WHY IT MATTERS

Purple content block

BUILD IT

Amber action block

SCREENS

UI & DIGITAL

BUTTONS & STATES

Primary CTA: white pill on dark (site standard), or the Motion Gradient for the boldest moment. Pill radius, Space Grotesk 700, verb labels. States: hover lifts + brightens, active presses, focus shows a blue ring, disabled muted.

SECTION BACKGROUNDS

Dark-first: Carbon is default. Alternate Carbon with one vibrant gradient block for emphasis. Reading-heavy pages may flip to Paper. Never stack two vibrant blocks without a Carbon break.

EMAIL HEADER

Carbon bar, reversed logo left, Aura right; one white-pill CTA. Body on white for deliverability.

SOCIAL TEMPLATES

Statement	Carbon + big caps + Aura
Announcement	Coral / purple gradient block
Aura-led	Orb hero + short line + CTA

Sizes: 1080×1080, 1080×1350, 1080×1920.

HOW IT MOVES

MOTION & ANIMATION

The brand is literally "in motion." Movement is fast, confident and smooth — with a little spring. Things rise and accelerate, then settle. Nothing drifts down.

PERSONALITY

200–400 ms, ease-out; UI snappy and decisive. Aura carries the playful spring so the rest of the UI can stay crisp.

AURA SIGNATURE

Idle float + glow pulse; spring bounce on appear; sparkle burst on success; a gentle lean toward what it's "responding" to. This is the brand's most recognisable motion.

TRANSITIONS

Slide-up reveals, wipes along the slash diagonal, gradient sweeps. Stagger lists so they build in sequence.

LOGO ANIMATION

The motion slash shoots through to form the "A", the gradient sweeps green→blue, "IM" snaps in, then Aura pops up beside it with a bounce.

AURA IDLE: FLOAT + GLOW PULSE

EVENT BANNER · GRADIENT BLOCK

PITCH DECK & SOCIAL GRID

Decks: Carbon slides, SuperheroKH caps titles, gradient dividers, Aura accents. Social grid: alternate dark statement tiles, vibrant gradient tiles, and Aura-led tiles for a rhythmic, high-energy feed.

MERCH & SWAG

Tees and stickers of Aura; hoodies with the gradient "A"; lanyards and roadshow banners in Carbon with the motion slash. Bold and minimal: the mark, Aura, and one line.

BUILD FASTER. THINK SHARPER. SCALE STRONGER.
