

GRAPHICS SYSTEM

SUPPORTING ELEMENTS

Bold, fast, unmistakably AIM.

AIM's ready-to-use graphic parts: pills, slashes, frames, badges and numbers. Drop them in to build fast, bold, on-brand visuals.

THE ELEMENT SET

HOW THE SYSTEM WORKS

Start on a dark background. Add one bold statement, one accent colour, and one or two elements. Keep it clean and let it breathe. That's the whole system.

ELEMENT	WHAT IT'S FOR
Kinetic pills	One bold word in a gradient pill. Great for the tagline and CTAs.
Motion slash	A rising gradient bar. Splits sections and points forward.
Slash-frame	A tilted frame that holds photos and content at the brand angle.
Shapes & badge	Gradient parallelograms, rings, and the AI-in-Motion badge.
Index numerals	Big outline numbers that sit quietly behind section titles.
End card	Logo, Aura and one pill to close.

USE

Bold type, high contrast, one accent colour per layout, and fast, confident motion.

AVOID

Clutter, more than one accent gradient, drop shadows, slow fades, and busy backgrounds.

ELEMENT 01

KINETIC PILLS

The signature kinetic device: one bold word in a gradient lozenge. Built for motion — words snap in one after another. The tagline rhythm lives here.

FASTER**SHARPER****STRONGER**

TAGLINE SET: FASTER (MOTION GRADIENT) · SHARPER (CORAL) · STRONGER (AMBER)

ANATOMY & RULES

Full-radius pill, gradient fill, display caps centred, optical padding $\approx 0.4 \times$ cap-height each side. White text on Coral/Purple/Green; near-black text on Amber and white pills for contrast. One word per pill. Never wrap, never lowercase.

VARIANTS

APPLY NOW**AI IN MOTION**

White pill = primary CTA. Purple = label/section. Add a trailing arrow only on CTAs.

MOTION

Pills pop in on a spring (scale $0.9 \rightarrow 1$, 220 ms), hold, then wipe out along the slash diagonal. Stack the tagline as three quick beats. Never fade slowly — AIM pills are decisive.

DO

One strong word; one accent gradient per pill; tight, confident spacing.

DON'T

Sentences in a pill, mixed gradients in one pill, drop shadows, outline-only neon.

ELEMENT 02 & 03

THE SLASH & FRAME

The slash is AIM's connective tissue, lifted straight from the "A". As a bar it divides and points; as a frame it holds photography and content at the brand's signature angle.

MOTION SLASH · DIVIDER / POINTER (ALSO IN CORAL)

SLASH-FRAME · HOLDS PHOTOS & CONTENT

RULES

The slash always rises left-to-right at the logo angle (~16–24°). Use it to separate sections, underline a headline, or mask a photo into the Slash-Frame. Keep one slash direction per layout. Frame edge stays ≤ 8px; never thick neon outlines.

DO

Consistent angle, gradient edge, photos cropped cleanly inside the frame.

DON'T

Mixed angles, downward slashes, drop shadows, busy photos that fight the gradient.

ELEMENT 04 & 05

SHAPES, RINGS & INDEX

The geometric vocabulary that floats through layouts and end cards: gradient parallelograms, rings, the AI-in-Motion badge, and oversized outline numerals for section structure.

PARALLELOGRAMS · GRADIENT RING · AI-IN-MOTION BADGE · INDEX NUMERAL

USAGE

Parallelograms anchor end cards and accent corners. The ring frames Aura or a stat. The badge is a stamp for hero moments and merch. Index numerals sit large and low-opacity behind section titles to give structure, like the reference does with "02".

RULES

Shapes share the slash angle and the brand gradients. Max two accent shapes per layout. Numerals in SuperheroKH outline only, 6–10% opacity behind content. Never fill the whole frame with shapes — leave Carbon to breathe.

COMPOSITION

DEVICES IN USE

A few canonical layouts. Build everything from Carbon up: one statement, one accent gradient, one or two devices, room to breathe.

STATEMENT TILE · INDEX + HEADLINE + CTA + SLASH

END CARD · LOGO + AURA + PARALLELOGRAM + BADGE

LOWER-THIRD (FOUNDER VIDEOS)

NAME TAG · SLASH BLOCK + CAPS NAME + GREEN ROLE
